Professor Gray

Dr Sir: We have your favor of 3d. We have not yet printed the Map & corrections can be made.

We are anxious to have the Young Britain ready for Spring. It will unquestionably aid the Series, & Spring is the time for it. We should be glad to have it involve as little outlay as possible. We understood you to say that many of the cuts cd be taken from the Lessons & Text Books. Of course, the more the better. We will commence electrotyping as soon as you are ready. We hope you will not make it too large: it is very desirable to keep it within limits to enable us to retail it for 50 cents. Much of its success, as well as adaptedness, depends on its size & price. We thank you for suggestion respecting pay. of engraving bills. It will be more convenient to remit it in a few weeks: tho' if you have any pressing occasion for it sooner, please inform us & it will be sent. Very truly Yours &c Ivison Phinney &
